

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Claims 1-14 (canceled).

15. (currently amended) A communication apparatus, comprising:
a communication device for receiving an identification signal from an originating communication apparatus, the identification signal identifying the originating communication apparatus, and performing an output operation when the received identification signal from the originating communication apparatus coincides with a pre-stored identification signal,
wherein said output operation includes an operation of repeatedly printing a plurality of copies of an image data signal representing the entire document being received into a plurality of groups subsequent to the receipt of said identification signal on recording sheets .

16. (previously presented) The communication apparatus according to claim 15, wherein a process of bundling each group of copies one by one is performed after said output operation.
